

EduGenie Functional Specification Document

1. Project Information

Item	Details
Project Name	EduGenie Google Gemini Powered Learning Assistant
Version	1.0.0
Backend	FastAPI
Frontend	HTML, CSS, JavaScript
AI Provider	Google Gemini
Repository	EduGenAi_SmartBridge
Target Users	Students, self-learners, and educators

2. Project Objective

The objective of EduGenie is to provide a lightweight AI-powered educational assistant that helps users understand concepts, answer questions, generate quizzes, summarize learning material, and create personalized learning roadmaps.

3. Scope

Included

- Educational question answering
- Simplified concept explanation
- Quiz generation
- Educational text summarization
- Personalized learning roadmap
- Responsive frontend
- REST API
- Gemini integration
- Input validation
- Error handling

Not Included in Version 1.0

- User login
- Database storage
- Saved user history
- PDF file upload
- Voice interaction
- Automatic progress tracking
- Teacher administration panel

4. Functional Features

4.1 Question Answering

The user submits a question, learning level, and optional subject. EduGenie sends the request to Gemini and displays an educational answer.
