

EduGenie Problem-Solution Fit

Target Users

Students

Students need simple explanations, examples, and practice questions for academic subjects.

Self-Learners

Self-learners need guidance, study plans, and a clear learning sequence.

Educators

Educators need help creating explanations, quizzes, and learning material.

User Problems

- Difficult concepts are not always explained clearly.
- Educational content may not match the learner's level.
- Learners may not have enough practice questions.
- Long study material is difficult to revise.
- Self-learners may not know what to study next.
- Educators spend time preparing learning content.

Proposed Solution

EduGenie is a Google Gemini powered educational assistant that provides:

- Intelligent question answering
- Simplified concept explanations
- AI-generated quizzes
- Educational text summarization
- Personalized learning roadmaps

Value Proposition

EduGenie provides fast, simple, personalized, and interactive educational support through one lightweight web application.

Existing Alternatives

- Search engines
- Educational videos
- Textbooks
- Online courses
- General-purpose AI chatbots

EduGenie Advantages

- Focused specifically on education
- Beginner-friendly explanations
- Multiple learning features in one application
- Learning-level customization
- Quiz and roadmap generation
- Simple responsive interface

Assumptions

- Users have access to a web browser.
- The application can connect to Google Gemini.
- Users provide valid educational input.
- Users understand that AI responses should be reviewed.

Success Criteria

EduGenie will be successful when:

- Users can ask educational questions.
- Users can understand difficult concepts.
- Users can generate quizzes.
- Users can summarize study material.
- Users can create learning roadmaps.
- The application works on desktop and mobile screens.
